' Choose your Apple TV or AirPlay 2-compatible smart TV This tutorial is mainly discussing the following topics: Brief

Introduction on AirPlayIf you are an Apple fan, you surely know one or two about AirPlay, a wireless streaming feature on your iPhone, iPad, iPod touch or any Mac or Windows PC computer with iTunes.. If you've installed the drivers before, you may get a notification to update to the new drivers from the built in System Preferences pane.. You shift the audio with the F or G keys on a Mac, so you would have to hold down F for maybe 30 seconds to shift to -2000ms delay to account for the 2 second delay on VLC using Airplay (or make a macro, which I never did).. Also, you can stream such files from your computer to Apple TV Before starting AirPlay streaming, you need to have a full understanding of the compatible devices of Mac and TV.. High Quality Streaming No More Mirroring Beamer streams video directly so it will be played natively on Apple TV and Chromecast. ae05505a44 [Mbox Download Mac](#)
