About This Game

Sword Master VR, now with support for Oculus Touch & HTC Vive, brings you intense sword fighting gameplay that has never been possible in traditional video games. Taking full advantage of room-scale virtual reality, you must learn to fight with realistic swords in full 360 combat! React quickly, duck and dodge, deflect incoming attacks! Sword Master VR is not a game of standing still and lightly wiggling your sword in the enemies face. Sword Master VR is a game of endurance, skill, speed, and most importantly, to become a master of the blade.

NEW!

10 Unlockable Shields! Each level that you beat in Expert mode unlocks a new shield!

Features:

- Intense & Challenging Sword Fighting!
- 8 Unlockable Swords!
- 7 Enemy Variations!
- 10 Challenge Levels (Including a Boss Level!)
- 4 Difficulty Modes (1 Unlockable mode!)

Safety Notice:

Sword Master VR requires players to swing their controllers in virtual reality. Play at your own risk. Eric Tereshinski, the game's developer, is not responsible for any destruction of property or the injury of yourself or anyone else while playing Sword Master VR.

Please play far away from your TV, have plenty of space, use high quality wrist straps, remove all children from the room, DO NOT play near any stairs, and enjoy the game :)

Room-Scale Info:

Sword Master VR will play correctly with as little as 2m x 1.5m playspace. However, it is recommended for best playing experience to have 2.5m x 2.5m of playspace or more.

Oculus Setup Info:

This game requires the use of motion controllers and roomscale. If you have the basic Oculus Touch kit with two sensors, two controllers, and your Oculus HMD, you can set up your playspace for roomscale and play Sword Master VR. To set up roomscale, you must set up your two sensors in opposite corners of the room. Adding a third sensor may improve your experience, but two sensors still works quite well.

very great game for this price!

i wonder if i make a game just like this but it can save game, would Steam accept it?. Expecting fun mouse minigames like the ones in Mario Paint? Nope, just brutal, sadistic, unfun challenges here. They even show you getting whipped by a dominatrix after you lose to drive the point home.. It's an okay game for its price but goddamit constantly appearing diplomatic windows make it almost impossible to enjoy.. the forces of zaru say this game is trash. A well-made game with good attention to details. I wish it got more coverage and reviews as I think those would be mostly positive and the devs would deserve for the game to be noticed at least in the community of bullethell enthusiasts. The folklore atmosphere is good and spans consistently over the story, characters and soundtrack. The mix of Finnish and Japanese elements is interesting and fresh. The difficulty is high, as it should be and the core gameplay well implemented. If you like a challenge, smooth bullethell shoot'em up gameplay and welcome the idea of atmospheric story elements in a fresh and unique take, then get this one.. YES !! WOW HOW DID I MISS THIS GAME !!!

**ADDICTIVE ! ADDICTIVE !! CANT STOP PLAYING
BIG BOYS TOYS!!!**

15 /10

. short, not very good at the 'horror' aspect or any real 'story' to speak off. The puzzles are super easy.

The first one wasn't great but it was better than this garbage.

and the want £4+ for it?? (I got mine in a humble bundle) not worth the money.

music was alright.

. Fun game, amazing graphics and the 3D clouds are amazing. You get a real sense of speed when flying through the clouds and a it is very similar to the real thing. Shooting down alien ships is challenging however very rewarding. I thought it was a very polished game for being early access and look forward to future developments

That's game is kinda fun, but that music on the start.. It's weird.

Recommended, though.. Really enjoying AOF:UNdead King. It is a fun tactical game that was easy to learn. You should try it. A cheap bang for the buck. Loads of fun with friends. 10 / 10 for space suit penguins , love this game. I was hoping that I could use the 'wasd' keys with the mouse as in other fps games (strafing). It seems as if you can't so the keyboard option is pointless and unnatural to use. I'll use the controller from now on, but that means I probably won't ever play the game tbh. Maybe I'm missing something? Looks like a good game otherwise.

I understand VR games need to be different to 'normal fps games', apparently to fully appreciate environment.

Being honest, I just want to play VR games the same way I play other fps games with mouse and keyboard... Fed up with the slow and disconnected feeling of a xbox controller.
